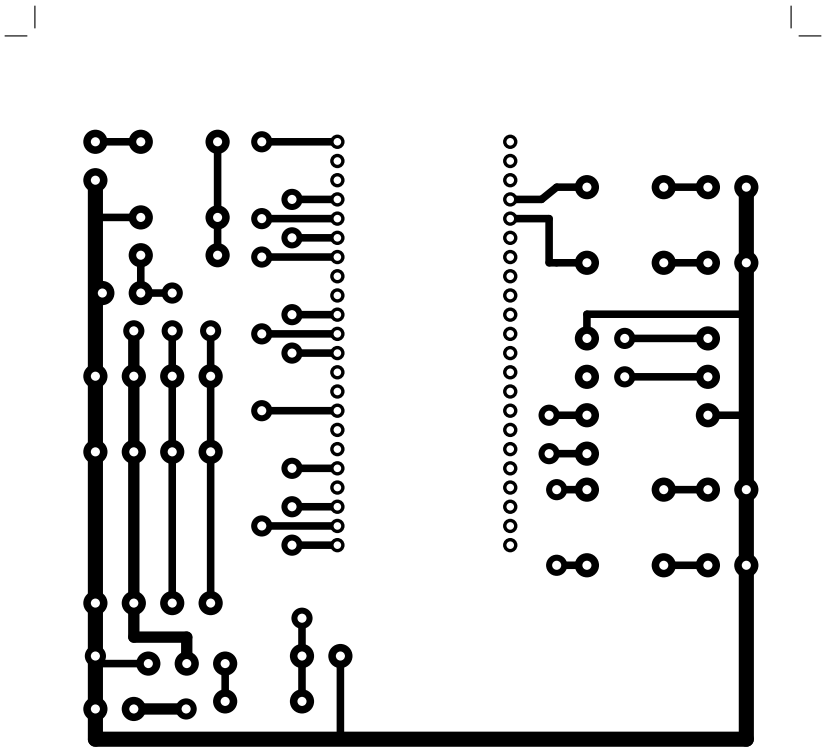
ESP32-S3 / single bottom copper / 1:1

FACE-DOWN TRANSFER MASTER - component-view orientation.
Black = copper to KEEP. White = copper to REMOVE. Positive artwork.
Print Actual size / 100%. Turn OFF fit, borderless enlargement and printer mirroring.
Use monochrome maximum-quality output. Verify the rulers on the physical print.
No wire jumpers, silkscreen or page frame are inside the copper mask.



Board crop marks span 100.00 x 100.00 mm

20 mm

100 mm

Orientation check: battery-sense pad J7/1 is near the upper LEFT.
Top wires: 13 INSULATED jumpers. Install separately using wire-links.csv.
Prototype only: verify purchased module fit and print scale BEFORE etching.
Keep bottom-copper order: a face-down transfer reverses the printed master.
For a transparency/contact process, choose orientation by its final film contact face.
Do not use unchanged with negative dry-film resist: it needs opposite polarity.
